

**GigaCore**  
ETHERNET SWITCHES

# RELEASE NOTES

---

**VERSION 2.8.7**

## DOCUMENT INFORMATION

With v 2.8.7 Luminex brings improvements to the GigaCore range for increased stability.

## FIXES & IMPROVEMENTS

- IGMP: Upon receiving general queries, updates on IGMP routerports will be performed only if the General query is originating from a real querier.
- AVB: An issue was resolved where disconnecting a listener would cause a brief flood of stream traffic for other listeners causing a potential small data loss on these listeners under certain conditions.
