RELEASE NOTES LUMINODE 2.2.4

LumiNode
#WhereTraditionMeetsInnovation

DOCUMENT INFORMATION

This document lists the new features and bugfixes available in the new LumiNode firmware.

This officially supported version 2.2.4 replaces the 2.2.3 release.

NEW FEATURES

- Due to a change, required in the production-process of the LumiNode product range, we have replaced version 2.2.3 with this new official version 2.2.4.

  All newly produced LumiNodes will ship with this new firmware version on board.

  In order to keep your LumiNode up with the latest status, we recommend all users to upgrade to this version.
