

MBK110V

Mounting bracket for VEXO110(A)

The MBK110V mounting bracket is specially designed for mounting the VEXO110 series speakers. These optional clever U-brackets allow the easy installation of the VEXO series both horizontally and vertically, thanks to a provided slot the VEXO series speaker will glide easily and safely into the bracket making installation a piece of cake.

A possible inclination of -90° to $+35^{\circ}$ ensures optimal positioning of the speakers. It is even possible to mount the VEXO series to the ceiling which allows installing the loudspeaker cleanly in any environment.

For the installation of these brackets, the pole flange adapter in the bottom of the speaker has to be replaced with a screw flange adapter, which is included with these optional brackets. They are constructed of solid steel and come with all the necessary parts for safe mounting. This bracket is also available in white.

Product Features:

Dimensions	105 x 566 x 309 mm (W x H x D)
Weight	4.64 kg
Construction	Steel
Colours	Black (MBK110V/B) White (MBK110V/W)
